PORTAL AUTO-POPULATION & RETROSPECTIVE CANCELLATION AUDIT:
The above invoice duly auto-populated into the Form GSTR-2A of the Recipient (Apex Precision Engineering Pvt Ltd) under Part A. The recipient availed credit in regular GSTR-3B filed on 20-11-2018.
Key Finding: The GST Common Portal itself accepted the supplier's GSTR-1 filing on 10-11-2018, validated the supplier's GSTIN, and auto-populated the invoice into the buyer's GSTR-2A. The retrospective cancellation order dated 15-06-2023 (w.e.f. 01-07-2017) was issued nearly 5 years after the government's own portal treated the supplier as valid.
Circular 183 Safe-Harbor: For FY 2018-19, CBIC Circular No. 183/15/2022-GST protects bona fide recipients where the supplier reported the invoice in GSTR-1 and tax was paid through banking channels. The buyer cannot be penalized for an administrative act (retrospective cancellation) that occurred years later.
